## WHEN THE STAR ENTERS.

In This Country the Leading Actor Thinks He Should Be Received with Applause.

One of the stage conventions altogether American concerns the "entrance" as it is called. This is the applause that greets the star when he first comes on the stage; and no American actor who can have a say in such a matter would think of accepting a play that did not allow him to come first before the public in some striking fashion that would arouse the audience to an outburst of enthusiasm.

Authors are compelled to rack their brains for effective ways of introducing stars. And this custom is known in no other country, says the New York Sun.

In France and Germany the leading actor enters whenever the action of the play requires it. If it seems to the author more appropriate, he will have the actor on the stage when the curtain rises.

Imagine an American star quietly seated on the stage when the curtain rises in the first act. What a contrast to the usual maneuvering and planning to bring him first into view in a way that will stimulate the audience to the most enthusiastic outbreak!

It is the librettist for the comic opera star who finds his task in this particular most difficult. He is driven to all sorts of stratagems to devise new means of hurrying the star into view. He may shoot him out of an automobile into the middle of the stage or toll him down the steps—any method permissible that brings him strikingly into view.

The task of the playwright is somewhat easier. But he must under all circumstances provide an effective entrance if he wants to get another order from a star.

A French play that had been popular for a long time in Paris was never accepted here because the heroine was discovered on the stage when the curtain rose and there was no means of changing the scene, try as the adaptors might. She had to be on the stage at that time. So the play went begging, and to this day it has never been acted here, although it would furnish an admirable vehicle for a star. In England there is no such importance placed on the question of the "entrance" as there is here.

Chinamen in New York.  
The Ah Sins of Gotham appear to be steadily increasing in numbers. No doubt the Celestial population here is recruited in part by smuggling immigrants over the Canadian border; but it is also true that New York, above other American cities, is a magnet drawing queer wearers from other places in the United States. But the Chinese are here almost without exception quiet and peaceable and do no harm. Manhattan's Chinatown is not a disease-breeding pesthole, as Chinese settlements are said to be in some regions of Asia and even of America. The death rate in Mott street, Pell street and the vicinity is not excessive, and most of the people in that district are in fair health. Not a few of them live to a good old age.—N. Y. Tribune

John and Soft Snaps.  
If the average man would quit looking for soft snaps and stick to his regular job he would be better off financially.—Chicago Daily News.
